Solution

! The Problem

**Government benefits are everywhere.
Finding the right ones isn't.**

Citizens have to navigate multiple portals, complex eligibility rules and different documents across departments.

This leads to:

- ❌ People miss relevant benefits
- ❌ Rules are hard to understand
- ❌ Confusing document requirements
- ❌ Same information entered repeatedly
- ❌ No clear follow-up after application

✓ Our Solution

JanMitra AI
Your AI Guide to Citizen Benefits & Services

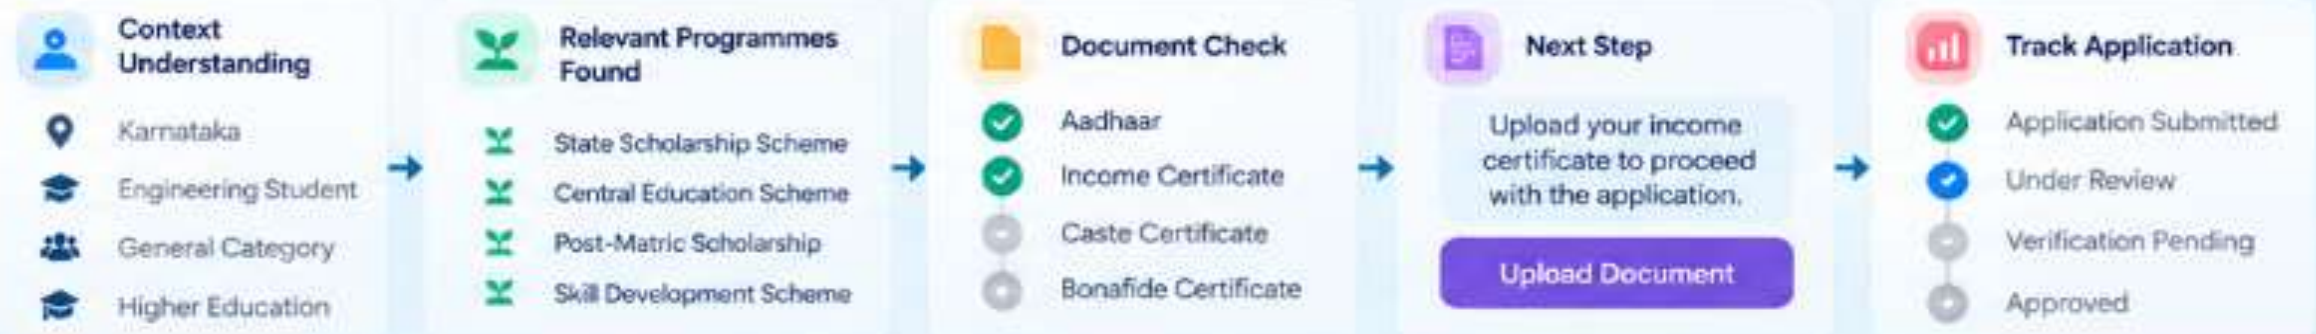

“Tell us about your situation and what you need.”

Example: Student

“I’m an engineering student from Karnataka and I want help with scholarships.”

Tech Stack & Architecture

Tech Stack

AI / LLM Groq API

- ✓ Fast inference
- ✓ Context understanding
- ✓ Eligibility reasoning
- ✓ Document analysis

groq

Automation n8n

- ✓ Agent orchestration
- ✓ Workflow execution
- ✓ Scheduled follow-ups
- ✓ Notifications
- ✓ Status monitoring

n8n

Database Supabase / PostgreSQL

- ✓ Citizen profiles

Welfare & family benefits

Senior Citizens

Social-security services

Entrepreneurs

MSME & business assistance

Workers & Families

Welfare & support programmes

3 Future Scope

From a State Solution to a National Impact

PAN-INDIA

Central + State + Local programmes

MULTILINGUAL

Indian languages + Voice-first interaction

AUTONOMOUS

Continuous status monitoring & follow-ups

HUMAN-IN-THE-LOOP

Citizen approval before sensitive actions

2 What Makes JanMitra Different

Traditional Process

Citizen has to do everything manually

Search

Find the right scheme

Read

Understand complex rules

Apply

Fill forms and submit documents

Follow Up

Manually check status

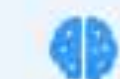

JanMitra AI

Citizen just shares their situation

Tell

Share your situation in simple words

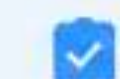

Understand

AI analyzes your context

Discover

Finds relevant schemes & benefits

Check

Guides documents & eligibility

Act & Track

Helps apply and monitors progress

“ From “I don’t know what I’m eligible for” → to “I know what to explore and what to do next.” ”

— JanMitra AI —

Understand. Discover. Act.
